What are Digital Identities?

People, companies and objects are identified through their attributes.

Types of Digital Identities

DIGITAL ID COVER ALL TYPES OF IDENTITIES, WITH SMARTPHONES BECOMING THE MAIN CHANNEL DRIVING THE ADOPTION

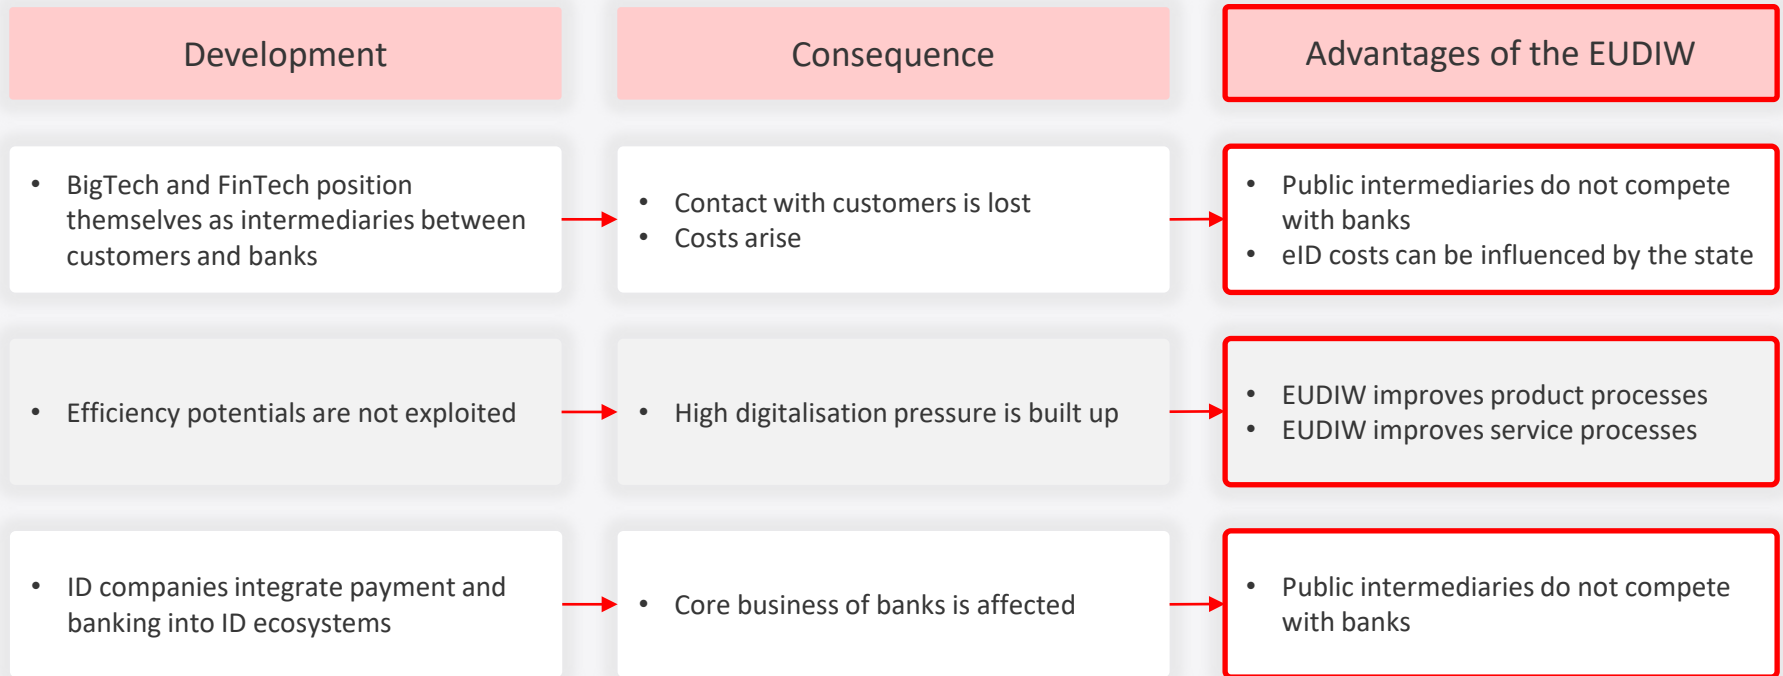

BigTechs dominate Digital Identities

Developments in the market and the consequences

Digital Identities for all Europeans through the EU Digital Identity Wallet (EUDIW)

The screenshot shows a web browser window displaying the European Commission website. The browser's address bar shows "ec.europa.eu". The page header includes the European Commission logo, the text "European Commission", and a search bar with "English" selected. Below the header, a breadcrumb trail reads: "Home > Strategy > Priorities 2019-2024 > A Europe fit for the digital age > European Digital Identity". The main heading is "European Digital Identity".

Digital Identity for all Europeans

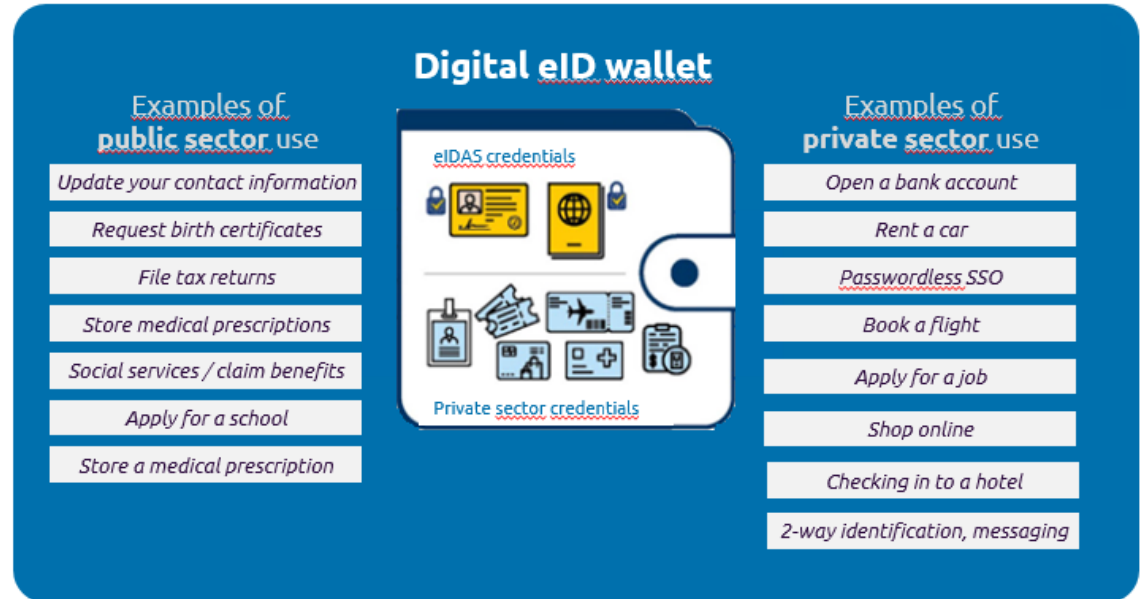

The illustration features a dark blue background. On the left, a person's profile is shown with a blue circular icon containing "eID" and a red ribbon. A dotted line connects this to a central graphic consisting of two overlapping blue banners with white text: "Digital Identity" on top and "for All Europeans" on the bottom. To the right, a blue wallet icon is shown with a red ribbon and a white "eID" label.

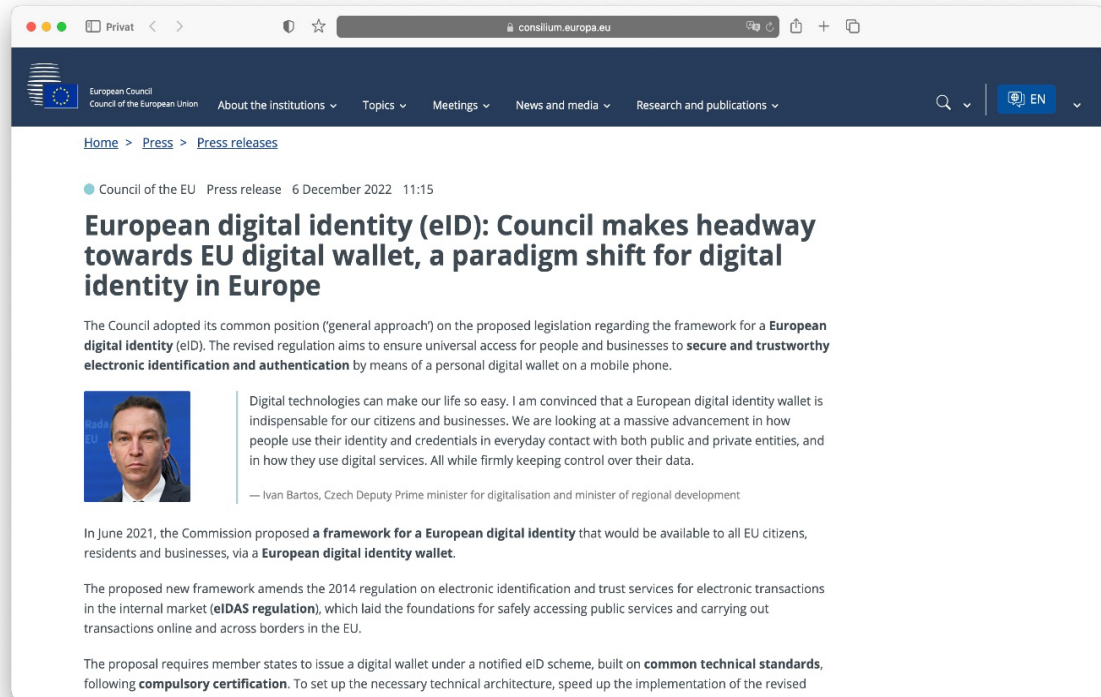

The European Digital Identity will be available to EU citizens, residents, and businesses who want to identify themselves or provide confirmation of certain personal information. It can be used for both online and offline public and private services across the EU.

Every EU citizen and resident in the Union will be able to use a personal digital wallet.

Use Cases

Member States will have to implement the EU Digital Identity Wallet

The screenshot shows a web browser window displaying a press release from the European Council. The browser's address bar shows 'consilium.europa.eu'. The page header includes the European Council logo and navigation links for 'About the institutions', 'Topics', 'Meetings', 'News and media', and 'Research and publications'. A search icon and a language selector set to 'EN' are also visible.

The main content of the page is a press release dated 6 December 2022 at 11:15. The title is 'European digital identity (eID): Council makes headway towards EU digital wallet, a paradigm shift for digital identity in Europe'. The text states that the Council has adopted its common position on the proposed legislation for a European digital identity (eID), aiming to ensure universal access to secure and trustworthy electronic identification and authentication through a personal digital wallet on a mobile phone.

A quote from Ivan Bartos, Czech Deputy Prime minister for digitalisation and minister of regional development, is included. He states: 'Digital technologies can make our life so easy. I am convinced that a European digital identity wallet is indispensable for our citizens and businesses. We are looking at a massive advancement in how people use their identity and credentials in everyday contact with both public and private entities, and in how they use digital services. All while firmly keeping control over their data.'

The press release further details that in June 2021, the Commission proposed a framework for a European digital identity available to all EU citizens, residents, and businesses. It also mentions that the proposed framework amends the 2014 eIDAS regulation, which laid the foundations for safely accessing public services and carrying out transactions online and across borders in the EU.

Finally, it notes that the proposal requires member states to issue a digital wallet under a notified eID scheme, built on common technical standards, following compulsory certification. The goal is to speed up the implementation of the revised framework.

eIDAS2

Large Scale Pilot

eIDAS 2.0

The eIDAS Regulation is to be amended "with a view to establishing a framework for a European digital identity".

All member states are to issue free ID wallets that can be used throughout the EU (Art. 6a para. 1).

Important functions of the wallet

The wallet must enable the user to identify himself/herself to third parties (Art. 6a para. 3a).

The wallet must enable a qualified electronic signature (Art. 6a para. 3b)

SCA-obligated companies must accept Wallet as an option for Strong Customer Authentication (SCA) (Art. 12b /6d para. 2)

Accompaniment by Large Scale Pilot

The Large Scale Pilot is intended to create a reference architecture for the European Identity Wallet and to test its interoperability and scalability in a national and cross-border context, to test user experiences and to collect feedback on the Wallet's reference applications. This information will also be taken into account in the legislative process.

The Large Scale Pilots

POTENTIAL

Large consortium covering several use case. Priority use cases include Account Opening, Mobile Driving Licence and eHealth.

DC4EU

Priority: Education and professional credentials.

EWC

Priority: Travel.

NOBID

Priority: Payment.

NOBID

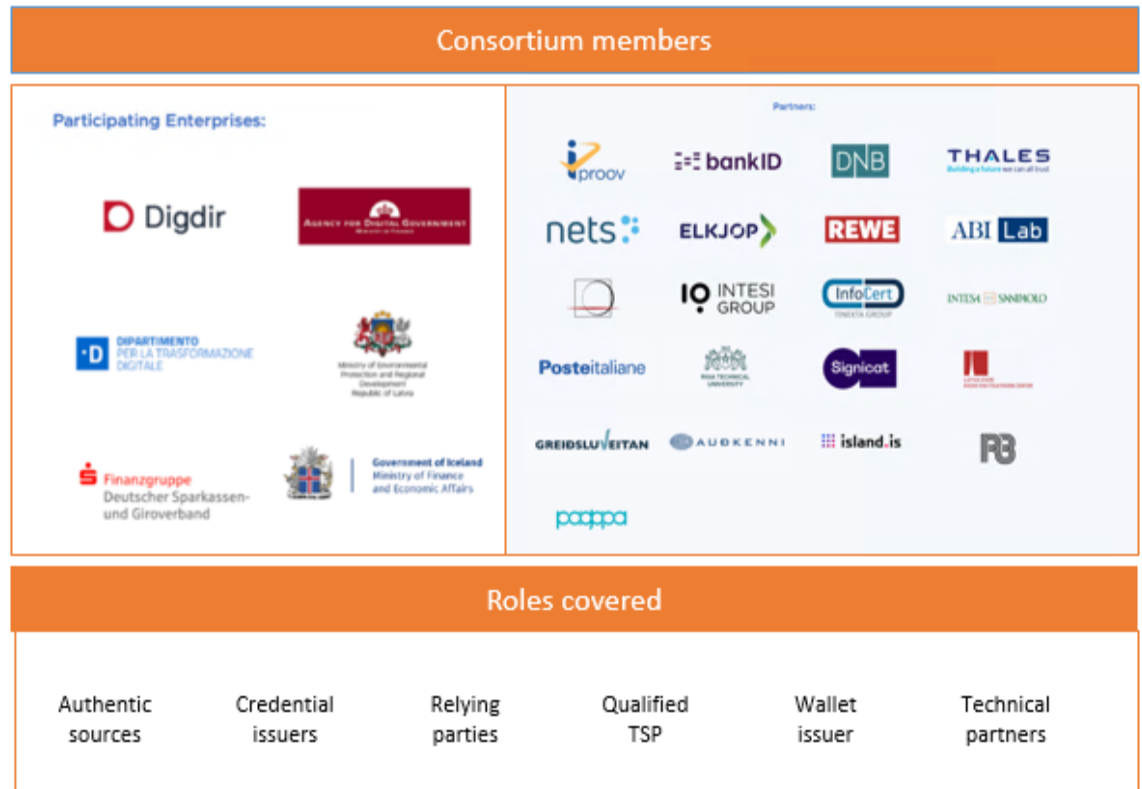

www.nobidconsortium.com

The NOBID (Nordic-Baltic eID) consortium includes participants from 6 Member States and focuses on the payment use case.

- Large expertise in eID and digital payments
- Strong National Commitment
- Leading partners from the public and private sector
- Advanced eID and Payment infrastructures in all six countries
- Six wallet issuing countries
- Fully alignment with the ARF

Participants

Norwegian Digitalisation Agency (Digdir), Danish Agency for Digital Government (DIGST), Italian Department for Digital Transformation (DDT), Latvian Radio and State Television (LVRTC), Ministry of Environmental Protection and Regional Development of the Republic of Latvia (VARAM), Icelandic Ministry of Finance and Economic Affairs (FJR), SEB Bank, BankID, DnB, German Savings Banks Association (DSGV), Italian Banking Association (ABILab), Intesa Sanpaolo, Nets (Nexi Group), PagoPA, Greiðsluveitan, Rewe Group, Elkjøp, iProov, Thales, Auðkenni, Istituto Poligrafico Zecca dello Stato (IPZS), Poste Italiane, Intesi Group, Infocert, Signicat, Fondazione Bruno Kessler (FBK)

Scope

Issuance and usage of the Wallet, onboarding of the eIDs,
integration with national eID ecosystem

Identification and authentication
(e.g. Login to online banking)

Issue credentials for use in the EUDIW

A2A payment using credentials from the EUDIW

On-boarding of users to financial services and QES

Collecting KYC information / AML check

Other value-added services

Work Packages

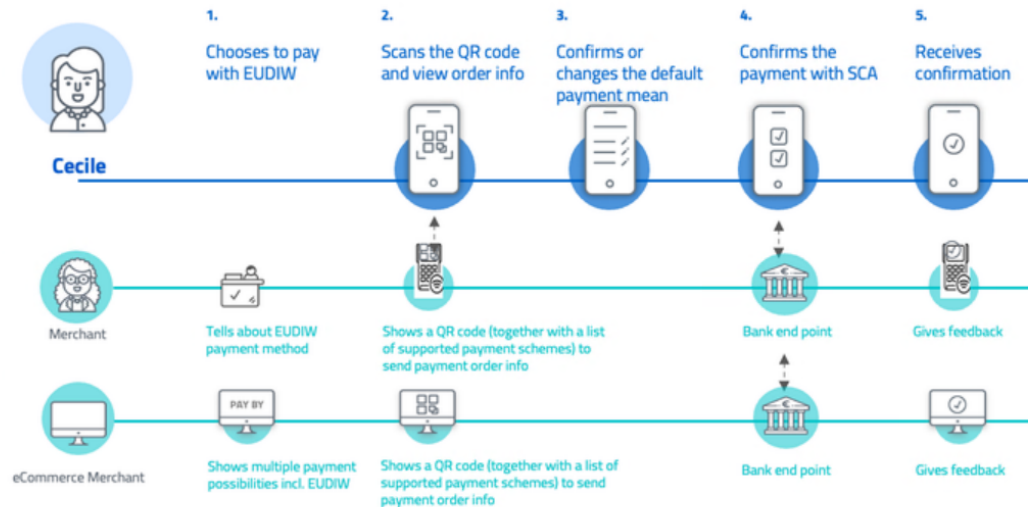

THE NOBID PROJECT IS DIVIDED INTO 9 WORK PACKAGES

<p>WP 1 Project management and coordination Lead: DigDir</p>	<p>WP 2 Stakeholder engagement: Promotion, outreach & communication Lead: DDT</p>	<p>WP 3 Adding future partners and ensuring cross-border interoperability of the wallet Lead: DigDir & DSGV</p>
<p>WP 4 Implementation & testing of the Digital Wallet Lead: Thales & LVRTC</p>	<p>WP 5 On-boarding to the wallet Lead: DIGST & LVRTC</p>	<p>WP 6 Issuing additional attributes Lead: DigDir & Infocert</p>
<p>WP 7 Issuing payment instrument & testing payment use case Lead: DSGV & Intesa Sanpaolo</p>	<p>WP 8 Qualified Electronic Signature (QES) and use case Lead: Intesi Group & Signicat</p>	<p>WP 9 Cross-border identification matching Lead: DIGST & LVRTC</p>

A Possible Flow

Option A

1. The payer decides to pay with the EU-Wallet
2. The payee generates a QR-Code with the payment request info together with a list of supported payment schemes by him and ask the payer to scan. The payer scans the QR Code and view order info on the EU-Wallet-App.
3. Optional: If not a preselected, compatible payment select appropriate scheme.
4. The payer confirms the payment biometric as SCA (SCA is not required for Low Value Payments)
5. The payee receive confirmation.

Thank You!
